## **Evolving Technologies: Impacts, Risks, Opportunities, & Challenges**

### **OVERVIEW**

This workshop empowers decision-makers and professionals to engage with emerging technologies not just as users—but as shapers of their impact. Participants will build the capacity to evaluate technological shifts through a strategic lens, identify both opportunity and risk, and contribute to resilient, forward-looking policies and systems. It's a vital primer for anyone working at the intersection of innovation, governance, and transformation.

### **Audience**

Designed for public and private sector leaders, innovation managers, strategic planners, policy advisors, researchers, technologists, and institutional reformers. Especially valuable for those working in tech-sensitive sectors such as governance, security, education, finance, and international development.

### **Instructors**

Led by futurists, technology analysts, policy innovation experts, and interdisciplinary researchers who specialize in the analysis of emerging technologies and their societal, legal, and economic impact. Instructors integrate strategic foresight with case-based learning and institutional planning tools.
